

BAY AND BOW FEATURES

A Head

B Side Jamb

C **Seat Board:** 1¼" Furniture Grade Oak or Birch Veneer.

D **Edge Banding:** Exposed plywood interior edges of the head, seat and side jambs are covered with matching wood edge banding.

E Our **solid wood mullion** design is lag bolted to the head and seat for maximum strength and support. This unique design is made out of TimberStrand® laminated lumber.

TimberStrand is made from Aspen trees cut into thin strands and then dried and laminated together with a polyurethane resin. It is then pressed and steam injected to create a wood billet creating a strong and durable material that is 25% stronger than standard wood and will not absorb or release moisture.

F This **window panning system** is the ultimate protection against water infiltration. The PVC panning profiles wrap around and are adhered to the vertical mullions and seat board creating an interior gutter system.

G The **exterior is PVC wrapped** and painted to match the window exterior color.

H To ensure our windows will never bow or sag, we use adjustable **turn-buckled cable support system** to support the frame from the top with heavy-duty 6" hook and turnbuckle.

I Side Wedge

J Mull Cap

K **Fully Insulated** (Optional)

L **Insulate to Jamb** (Optional)

Bay and Bow windows can be configured using a combination of Double Hung and Picture windows or Casement, Fixed Casement, and Awning Windows.
